

Co-funded by  
the European Union

Programme  
Central Macedonia

The enterprise was co-funded by the European Union and National Resources under the Action of the “Central Macedonia” Programme, ΕΣΠΑ 2021–2027, “Innovation Investment Plans.”

The project **Actoil** ( Project Code: **KMP6-0283869** ) aims to develop a new innovative pyrolysis process for plastic waste and end-of-life tires. The proposed new process introduces continuous-operation technology for waste processing with a dual purpose: both the **valorization of plastic and rubber waste** within the framework of the circular-economy and industrial-symbiosis model, and the **production of alternative liquid fuels and adsorbent materials** through innovative methods.

The project budget, covering the implementation period from **08/10/2021 to 07/02/2025**, amounts to **€400,000.00**, with **Public Expenditure** amounting to **€328,500.00**.
